

1.

OLIVA-1925 PLACE OFFER TO BUY ANOTHER PORTUGUESE FOUNDRY.

Oliva have recently submitted an offer to buyout a foundry in Portugal. The facilities available include a another GF moulding line, but larger than the one currently operating at Oliva, having a mould size of 1100mm x 900mm. The land area available is 40,000 sq.m; covered area is 14,000 sq.m. Capacity is 5,000 tonnes a year which would almost double that available at the moment; but 2 other parties are also bidding – so “watch this space” for further news.

2. TUBOS OLIVA

OLIVA STEEL TUBES AVAILABLE THROUGH DWCS.

As well as the OLIVA-1925 foundry, the parent Suberus group also operates a steel tube division – TUBOS OLIVA.

I have been asked to represent Tubos Oliva in the UK, as well as continuing to operate as the foundry's UK Sales Agent. Tube diameters from 3/8" to 4", black and galvanized, with plain or threaded ends, are offered.

If anyone is interested in further details, including our brochure with current price list, please let me know.

3.

MCPS LIMITED – Marine Cathodic Protection Systems.

Many of you will not be aware that I also do work for MCPS Limited, as Contract Sales Manager – the company specialises in corrosion protection and is based in South Shields, Tyne & Wear. If any of you own yachts (or even ocean-going craft or marinas!), which require protection, our services are just what you need. Visit our website: <http://www.mcpsltd.co.uk/index.html>
